

Description
The Second Year of the Six Year Program for the Study of Classical Ballet
Completion of the Elementary Work

Syllabus written by Vera S. Kostrovitskaya

In the Second Year tempos are somewhat faster. The length of the Barre Exercise should now take approximately 35 minutes. The exercises on demi-pointe (begun in the Barre Exercise in the First Class) continue with more repetition. Battement tendus jeté, ronds de jambe par terre, battements frappés and petits battements are practiced in both 1/4 and in 1/8 (alternating 1/4 and 1/8) in the second half of the year. The exercises on demi-pointe (begun in the First Class at the Barre) begin to be studied in the Center Exercise until they are practiced entirely on demi-pointe by the end of the first part of the year. The easiest movements en tournant begin to be taught in the Center Exercise. Adagios are constructed using the poses that have already been covered. New Allegro and Pointe vocabulary is introduced. Tours and batterie begin to be studied. Tour en l'air for the boy's class studied in the second half of the year.
